

Waste disposal fees

Non-weighbridge tonnage conversation table

Waste definitions																
C&D	Waste generated from construction and demolition activities as defined by the Building Act 1975, section 5 (includes infrastructure for roads, bridges, tunnels, sewerage, water, electricity, telecommunications, airports, docks or rail)															
General waste	Waste generated from all sources except construction and demolition - includes MSW, C&I and Green Waste.															
Commercial disposals - non-weighbridge tonnage conversion tables																
In lieu of a weighbridge to determine chargeable tonnage, commercial waste fees at non-weighbridge sites are based on the below tables, using the vehicle type, vehicle GVM or GCM and waste type to determine chargeable tonnage. The information in these tables has been obtained from the Weight Measurement Criteria set in the Waste Reduction and Recycling (Waste Levy) Amendment Regulation 2019																
Small vehicles																
Van or utility <4t GVM or standard trailer <3m ³									Sedan or station wagon <4t GVM							
	General			C&D				General			C&D					
Applicable tonnage	0.20			0.20			Applicable tonnage	0.05			0.05					
Van or utility with trailer <4t GVM									Sedan or station wagon with trailer <4t GVM
