

Fact Sheet

Flood level relationships for Paradise Dam, Walla gauge & Bundaberg gauge

How to use this information:

1. During a flood event, the Bureau of Meteorology (BoM) may provide a forecasted flood level for Paradise Dam or the Walla gauge. This information may be available on BoM's website or from other sources.
2. Use the charts below to relate the forecasted flood level from Step 1 to the corresponding flood level in Bundaberg. Levels in Bundaberg are in Australian Height Datum (AHD) and levels at Walla and Paradise Dam are in gauge height (GH).
3. Refer to the set of incremental flood maps and find the closest map that corresponds to the flood level from Step 2. This map shows the possible inundation based on the current forecast.
