Part 6 Zones

6.1 Preliminary

- (1) Zones organise the planning scheme area in a way that facilitates the location of preferred or acceptable land uses.
- (2) Zones are mapped and included in **Schedule 2 (Mapping)**.
- (3) The categories of development and assessment for development in a zone are in Part 5 (Tables of assessment).
- (4) Assessment benchmarks for zones are contained in a zone code.
- (5) A precinct may be identified for part of a zone.
- (6) Precinct provisions are contained in the zone code.
- (7) Each zone code identifies the following:-
 - (a) the purpose of the code;
 - (b) the overall outcomes that achieve the purpose of the code;
 - (c) the performance outcomes that achieve the overall outcomes and the purpose of the code;
 - (d) the acceptable outcomes that achieve the performance and overall outcomes and the purpose of the code; and
 - (e) the performance and acceptable outcomes for the precinct.
- (8) The following are the zone codes for the planning scheme:-

Residential zones category

- (a) Low density residential zone code;
- (b) Medium density residential zone code;
- (c) High density residential zone code;

Centre zones category

- (d) Principal centre zone code;
- (e) Major centre zone code;
- (f) District centre zone code;
- (g) Local centre zone code;
- (h) Neighbourhood centre zone code;

Industry zones category

- (i) Industry zone code;
- (j) High impact industry zone code;

Recreation zones category

- (k) Sport and recreation zone code;
- (I) Open space zone code;

Environmental zones category

(m) Environmental management and conservation zone code;

Other zones category

- (n) Community facilities zone code;
- (o) Emerging community zone code;
- (p) Limited development zone code;
- (q) Rural zone code;
- (r) Rural residential zone code;
- (s) Special purpose zone code; and
- (t) Specialised centre zone code.

6.2 Zone codes

6.2.1 Low density residential zone code

6.2.1.1 Application

This code applies to development:-

- (a) within the Low density residential zone as identified on the zone maps contained in Schedule 2 (Mapping); and
- identified as requiring assessment against the Low density residential zone code by the tables of assessment in Part 5 (Tables of assessment).

6.2.1.2 Purpose and overall outcomes

- (1) The purpose of the Low density residential zone is to provide for:-
 - (a) a variety of dwelling types, including dwelling houses; and
 - (b) community uses, and small-scale services, facilities and infrastructure, to support local residents.
- (2) The purpose of the Low density residential zone code will be achieved through the following overall outcomes:-
 - (a) development provides for low density residential activities that promote variety in housing size and choice;
 - (b) development is predominantly for dwelling houses and dual occupancies, with limited other residential activities established in the zone, such as retirement and residential care facilities and relocatable home parks, where such activities are of a scale and intensity that is compatible with the scale and intensity of the prevailing residential housing forms and are located with good access to community facilities, employment, public open space and public and active transport facilities;
 - (c) limited non-residential activities may also be established in the zone, where such activities provide for the day to day needs of the immediate residential community and do not detract from the residential amenity and character of the area, having regard to such matters as the location, nature, scale and intensity of the development;
 - the scale, density and layout of development provides for an attractive, open and low density form or urban residential settlement;
 - (e) development has a low-rise built form that maintains, and is compatible with, the existing low density residential character and amenity of the area;
 - (f) development is designed and located in a manner which makes a positive contribution to the streetscape, is sympathetic to its local setting, maintains the low intensity character of the zone and maintains a high level of residential amenity;
 - (g) development encourages and facilitates the efficient provision and safe operation of physical and social infrastructure; and
 - (h) within newly developing, greenfield areas:
 - interim land uses and development in the zone does not compromise the future potential of for urban purposes, as a result of the fragmentation of land parcels, the encroachment or establishment of inappropriate land use activities or other cause;
 - (ii) development and infrastructure provision occurs in a logical, orderly and efficient manner and is appropriately integrated with, and connected to, the surrounding urban fabric:
 - (iii) development sensitively responds to inherent physical constraints, environmental constraints, natural hazards, scenic amenity values and landscape character elements:
 - (iv) development provides for efficient and effective transport networks that maximise accessibility within and to newly developing areas; and

(v) development for sensitive purposes incorporates appropriate buffers to potentially conflicting land uses, including industry and enterprise areas, rural activities, and infrastructure.

6.2.1.3 Specific benchmarks for assessment

Table 6.2.1.3.1 Benchmarks for assessable development

Performance outcomes	Acceptable outcomes
Residential uses	
PO1 Development provides for a compatible mix of low density residential activities.	AO1 Development is for:- (a) Caretaker's accommodation; (b) Dual occupancy; or (c) Dwelling house.
PO2	AO2
Development for residential purposes other than a dwelling house or a dual occupancy occur in the Low density residential zone only where they are of a nature, scale and intensity that is consistent with the low density character of the locality, and have good access to public and active transport, employment, community facilities and public open space.	No acceptable outcome provided.
Non-residential uses	
PO3 A limited range of non-residential activities may be established in the Low density residential zone, provided that these uses:- (a) directly support the day to day needs of the immediate residential community; (b) are of a small-scale and low intensity; (c) are compatible with the prevailing residential character and amenity of the local area; (d) wherever possible, are co-located with other non-residential uses; and (e) are accessible to the population they serve and are located on the major road network rather than local residential streets. Note—such non-residential activities include community uses, parks, sales offices, shops (limited to corner stores) and utility installations (limited to local utilities).	AO3 No acceptable outcome provided.
Building height and built form	
PO4 Development has a maximum building height of 2 storeys and 8.5m. PO5 Development has a built form and scale that is sympathetic to the low density residential character of the zone, positively contributes to the streetscape and maintains or provides a high level of residential amenity.	AO5 No acceptable outcome provided. AO5 No acceptable outcome provided.
Note—in assessing whether development maintains or provides a high level of residential amenity, the assessment manager will consider both the potential impacts on the amenity of nearby residents and premises, and the residential amenity for future residents of the proposed development, having regard to (amongst other things):- (a) adequate day light and ventilation to habitable rooms, the extent and duration of any overshadowing and other microclimatic impacts; (b) privacy and overlooking impacts; and (c) building mass and scale as seen from neighbouring premises, and from the street.

6.2.2 Medium density residential zone code

6.2.2.1 Application

This code applies to development:-

- (a) within the Medium density residential zone as identified on the zone maps contained in Schedule 2
 (Mapping); and
- (b) identified as requiring assessment against the Medium density residential zone code by the tables of assessment in **Part 5 (Tables of assessment)**.

6.2.2.2 Purpose and overall outcomes

- (1) The purpose of the Medium density residential zone is to provide for:-
 - (a) medium density multiple dwellings; and
 - (b) community uses, and small-scale services, facilities and infrastructure, to support local residents.

Editor's note—the zone includes two precincts, being Precinct MDRZ1 (Bundaberg West medical/health hub) and Precinct MDRZ2 (Barolin Street office precinct), that also provide for particular business and community activities

- (2) The purpose of the Medium density residential zone code will be achieved through the following overall outcomes:-
 - development provides for a range and mix of low and medium density residential dwelling choices and forms, predominantly for permanent living;
 - (b) other medium density residential uses such as hostels, relocatable home parks, residential care facilities, retirement facilities, short-term accommodation and tourist parks may also be established in the zone;
 - (c) residential activities that provide short-term accommodation are located in areas that are highly accessible to tourists and travellers, whilst avoiding areas that are predominantly used for permanent living;
 - (d) limited non-residential activities may also be established in the zone, where such activities provide for the day to day needs of the immediate residential community and do not detract from the residential amenity and character of the area, having regard to such matters as the location, nature, scale and intensity of the development;
 - (e) the scale, density and layout of development facilitates an efficient land use pattern that supports compact, safe and walkable neighbourhoods that are connected to employment nodes, activity centres, open space and recreational areas, community services and facilities, educational opportunities and transport options;
 - (f) development encourages and facilitates the efficient provision and use of physical and social infrastructure;
 - (g) development has a low-rise (up to three storeys) built form that is compatible with, and is sympathetic to, the existing and intended scale and character of the surrounding area, with non-residential built forms subservient to residential built forms in the locality;
 - (h) development is designed and located in a manner which makes a positive contribution to the streetscape and maintains a high level of residential amenity; and
 - (i) in addition to the overall outcomes for the zone generally:-
 - development in Precinct MDRZ1 (Bundaberg West medical/health hub) provides for a cluster of medical, health care and allied services and facilities (including shortterm accommodation) that complement and support the hospitals located in Bundaberg West; and

(ii) development in **Precinct MDRZ2 (Barolin Street office precinct)** provides for small-scale business and community activities, predominantly in the form of offices and health care services, that take advantage of the precinct's prominent location along a major entry road into the Bundaberg CBD.

6.2.3 High density residential zone code

6.2.3.1 Application

This code applies to development:-

- (a) within the High density residential zone as identified on the zone maps contained in Schedule 2
 (Mapping); and
- (b) identified as requiring assessment against the High density residential zone code by the tables of assessment in Part 5 (Tables of assessment).

6.2.3.2 Purpose and overall outcomes

- (1) The purpose of the High density residential zone code is to provide for high density residential uses for permanent residents and visitors in close proximity to the activity centres of Bundaberg and Bargara, supported by community uses, facilities, infrastructure and a range of retail, commercial and entertainment activities to service the needs of both visitors and surrounding residents.
- (2) The purpose of the High density residential zone code will be achieved through the following overall outcomes:-
 - (a) development provides a range of higher density residential dwelling choices in multi-storey, generally medium rise, formats;
 - (b) mixed use development is facilitated in the zone to help create vibrant and active streets and public spaces;
 - (c) non-residential uses that occur as part of a mixed use development may provide for a range of activities that:-
 - complement tourist accommodation and enhance the attractiveness and function of the area as a visitor destination; and
 - (ii) offer food, shopping, entertainment and personal services to residents and visitors;
 - (d) other non-residential activities may also be established in the zone, where such activities provide for the day to day needs of the immediate residential community and do not detract from the residential amenity and character of the area, having regard to such matters as the location, nature, scale and intensity of the development;
 - (e) development encourages and facilitates urban consolidation and the efficient provision and use of physical and social infrastructure;
 - (f) the scale, density and layout of development facilitates an efficient land use pattern that supports compact, safe and walkable neighbourhoods that are connected to employment nodes, activity centres, open space and recreational areas, community services and facilities, educational opportunities and transport options;
 - (g) residential and mixed use development has a medium-rise built form that is compatible with, and is sympathetic to, the existing and intended scale and character of the surrounding area, with non-residential built forms subservient to residential built forms in the locality:
 - (h) development is designed and located in a manner which makes a positive contribution to the streetscape and maintains a high level of residential amenity; and
 - development provides and maintains a high level of residential amenity, safety and design quality and is set amongst attractive landscaped grounds.

6.2.3.3 Specific benchmarks for assessment

Table 6.2.3.3.1 Benchmarks for assessable development

Performance outcomes	Acceptable outcomes
Residential uses	
PO1 Development provides for a compatible mix of higher density residential activities catering for both permanent residents and tourists and visitors.	AO1 Development provides for the following residential activities to occur in the High density residential zone:- (a) Caretaker's accommodation; (b) Dual occupancy (where forming part of a mixed use building); (c) Dwelling house; (d) Dwelling unit; (e) Multiple dwelling; (f) Residential care facility; (g) Resort complex; (h) Retirement facility; (i) Rooming accommodation; or (j) Short-term accommodation.
Mixed use development and non-residential uses	(1)
Where mixed use development is proposed, active, non-residential uses are provided at street level such as small-scale shops and food and drink outlets (e.g. cafes and restaurants) and residential uses are located above or behind street level active, non-residential uses.	AO2 No acceptable outcome provided.
PO3 The type, scale and intensity of business activities in mixed use development does not undermine the Bundaberg Region activity centre network, and primarily service the needs of residents and visitors in the immediate neighbourhood	AO3 Development ensures: (a) shops or offices, have a gross leasable floor area not exceeding 400m²; and (b) in the case of a shopping centre, gross leasable floor area does not exceed 1,200m² for all tenancies and 400m² for any single
PO4	tenancy. AO4
Non-residential activities not forming part of a mixed use development may also be established in the High density residential zone, provided that these activities:- (a) directly support the day to day needs of the immediate residential community; (b) are of a small-scale and low intensity; (c) are compatible with the prevailing residential character and amenity of the local area; (d) wherever possible, are co-located with other non-residential uses; and (e) are accessible to the population they serve and are located on the major road network rather than local residential streets. Building height and built form	No acceptable outcome provided.
PO5	AO5
 (a) Residential development and mixed use buildings have a maximum building height:- (i) up to 6 storeys and 20m in Bundaberg; and (ii) in accordance with the building height limits for Bargara identified in Figure 6.2.3 (Bargara Building Heights). 	No acceptable outcome provided.
(b) Non-residential development has a maximum building height of 2 storeys and 8.5m.	
PO6 Development has a built form and scale that is compatible with the existing and intended residential character of the area, positively	AO6 No acceptable outcome provided.

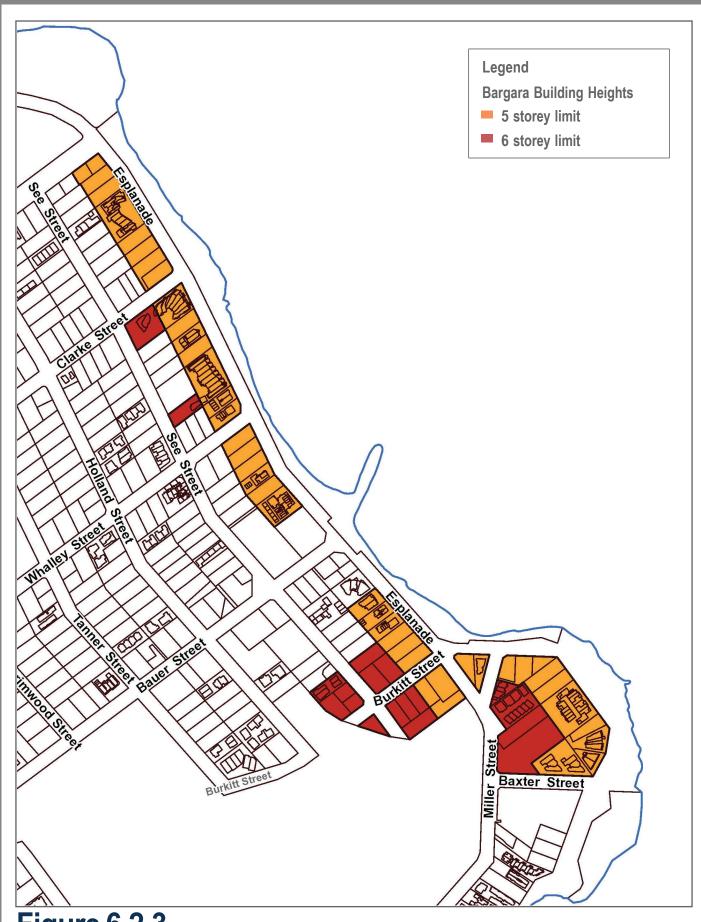

Figure 6.2.3 Bargara Building Heights

Version 6.0 effective 10 March 2023

6.2.4 Principal centre zone code

6.2.4.1 Application

This code applies to development:-

- (a) within the Principal centre zone as identified on the zone maps contained in Schedule 2 (Mapping); and
- (b) identified as requiring assessment against the Principal centre zone code by the tables of assessment in Part 5 (Tables of assessment).

6.2.4.2 Purpose and overall outcomes

(1) The purpose of the Principal centre zone code is to accommodate a wide range of business uses, entertainment uses, multi-unit residential uses and community uses within an active and vibrant mixed use environment.

The scale and level of intensity of such development should reinforce the intended role and function of Bundaberg CBD as the principal activity centre for the planning scheme area servicing the whole of the regional council area as well as areas outside of the regional council area.

- (2) The purpose of the Principal centre zone code will be achieved through the following overall outcomes:-
 - (a) development supports the role of the zone as the regional focus and location of the highest order retailing, entertainment, commercial, administrative and government services, and community and cultural facilities;
 - (b) any future full-line department store will be located in the principal activity centre, within Precinct PCZ1 (City Centre Core);
 - (c) higher density residential activities may be established where these activities complement the other functions of the zone;
 - (d) development provides for an efficient pattern of land use with high levels of accessibility and connectivity to transport networks;
 - (e) development has a built form, height and scale that is compatible with the prevailing character of the principal activity centre, incorporating high quality design elements that protect and respond to important heritage features, and contribute to a cohesive but visually interesting streetscape and skyline;
 - (f) development facilitates the creation of a vibrant and safe activity centre, with attractive and functional buildings that address the street, open space and other public places at a human scale, and provide active pedestrian friendly frontages, befitting of the zone's focus as a regional hub;
 - (g) development provides for efficient and effective transport networks that maximise accessibility within and to the centre;
 - (h) development encourages and facilitates the efficient provision and use of physical and social infrastructure; and
 - (i) in addition to the overall outcomes for the zone generally:-
 - (i) development in Precinct PCZ1 (City centre core) provides for, and has a building height and form that supports, the highest intensity and diversity of business activities and other uses to be accommodated in the precinct in a configuration that reinforces the role and function of the city centre core and is sympathetic to the character and scale of surrounding development and the existing streetscape;
 - (ii) development in Precinct PCZ2 (City centre riverfront) has a building height and form that is compatible with the character of the area and positively contributes to the streetscape, provides for a range of uses that take advantage of the riverfront setting, and is configured in a manner that increases activity levels in the area and enhances public accessibility to, and appreciation of, the Burnett River; and

(iii) development in **Precinct PCZ3 (City centre frame)** has a building height and form that positively contributes to the streetscape amenity, character and function and provides for a range of lower intensity activities that complement and support the higher order activities provided in the city centre core.

6.2.4.3 Specific benchmarks for assessment

Table 6.2.4.3.1 Benchmarks for assessable development

Performance outcomes	Acceptable outcomes
Land use composition and activity centre network	
PO1 Development in the Principal centre zone provides for the highest order of business activities (particularly retailing and offices), entertainment activities and community activities within the Bundaberg region.	AO1 No acceptable outcome provided.
PO2 Development provides a mix of medium and high density residential activities and short-term accommodation uses that are complementary to the predominant non-residential uses and business functions of the zone.	AO2 No acceptable outcome provided.
PO3 Development provides for an efficient pattern of land use where:- (a) the greatest mix of uses and highest intensity of development is located in areas with relatively high levels of access to public transport facilities; and (b) all development has a clear connection to the pedestrian, bicycle, public transport and road transport networks.	AO3 No acceptable outcome provided.
Built form and urban design	
PO4 The built form and urban design of development incorporates a high standard of architecture, urban design and landscaping that creates attractive and functional buildings, streets and places in keeping with the primary role and focus of the zone as a regional hub.	AO4 No acceptable outcome provided.
PO5	AO5
Development contributes to the creation of an active, safe and legible public realm, incorporating significant public open spaces including plazas, parks and gardens.	No acceptable outcome provided.
PO6 Building height and design contributes to a coherent, functional and visually interesting streetscape by:- (a) maintaining a low-rise built form along the street frontage; (b) ensuring that new development does not dominate the streetscape, but instead protects and respects existing heritage features and character values; and (c) enhancing the walkability of the centre, and the enjoyment of streets and public spaces.	AO6.1 Development integrates with adjoining and nearby development within the centre and:- (a) is built to the front boundary for any building (or part) up to 2 storeys in height; (b) for any part of a building exceeding 2 storeys in height, is set back from the front boundary to ensure the existing streetscape character and heritage facades are not impacted or dominated; and (c) maintains pedestrian comfort through the continuation of awnings or other footpath coverings that:- (i) extend for the full length of all street frontages to provide all-weather protection; (ii) cover the full width of the footpath; and (iii) are contiguous with adjoining buildings and awnings.

frame):-	
(a) has a maximum building height of 4 storeys and 15m; and	
(b) is of a lower intensity and scale relative to the city centre core precinct and city centre riverfront precinct.	
	1

6.2.5 Major centre zone code

6.2.5.1 Application

This code applies to development:-

- (a) within the Major centre zone as identified on the zone maps contained in Schedule 2 (Mapping);
 and
- (b) identified as requiring assessment against the Major centre zone code by the tables of assessment in **Part 5 (Tables of assessment)**.

6.2.5.2 Purpose and overall outcomes

(1) The purpose of the Major centre zone code is to accommodate a wide mix of uses including higher order retail, entertainment and commercial facilities in the major retail centre that services a subregional catchment population.

The zone may accommodate concentrations of higher order retail, professional offices, residential, administrative and health services, community and other uses capable of servicing a significant part of the planning scheme area, provided that these facilities and uses should not more appropriately be accommodated in the Bundaberg CBD.

The major centre is developed as a well-designed, safe and visually attractive business, community and employment centre.

The major centre complements and does not undermine the role and function of Bundaberg CBD as the principal activity centre for the region.

- (2) The purpose of the Major centre zone code will be achieved through the following overall outcomes:-
 - (a) development supports the role of the zone as a sub-regional focus and location of a wide mix of higher order retailing, entertainment and commercial activities that service a subregional population, and supports and strengthens linkages with nearby specialised activity centres, community facilities and industry areas, including the Bundaberg Airport, Bundaberg Recreational Precinct and CQUniversity;
 - a department store may be established within the major activity centre only once such a store is established in the principal activity centre;
 - (c) higher density residential activities may be established where these activities complement the other functions of the zone;
 - (d) major land uses contributing to employment, education and services in the Bundaberg Region are located in the centre commensurate with its subregional role and function.
 Development does not undermine or compromise the activity centre network by proposing a higher order or larger scale of uses than intended for the centre;
 - (e) new regional level State government facilities for justice, education, health, community, administration and employment activities serving the Bundaberg Region are located in the Bundaberg CBD as the principal activity centre rather than in this centre;
 - (f) development facilitates the creation of a vibrant and safe activity centre, with attractive and functional buildings, streets, open space and other public places provided, befitting of the zone's focus as a sub-regional hub;
 - (g) development creates a cohesive and walkable centre that reduces and mitigates barriers to pedestrian movement, including roads, vehicle movement and car parking, and reduces the need for additional vehicle trips within the centre;
 - (h) development ensures that the relationship between uses and the public realm is enhanced and that the centre is more outwardly focused over time;
 - (i) buildings and structures in the Major centre zone have a medium rise built form and do not unduly dominate their setting;

- (j) development encourages and facilitates urban consolidation;
- (k) development provides for efficient and effective transport networks that maximise accessibility within and to the centre; and
- (I) development encourages and facilitates the efficient provision and safe operation of physical and social infrastructure.

Development does not adversely impact on the continued operation, viability and maintenance of existing infrastructure or compromise the future provision of planned infrastructure.	No acceptable outcome provided.

6.2.6 District centre zone code

6.2.6.1 Application

This code applies to development:-

- (a) within the District centre zone as identified on the zone maps contained in Schedule 2 (Mapping);
 and
- (b) identified as requiring assessment against the District centre zone code by the tables of assessment in Part 5 (Tables of assessment).

6.2.6.2 Purpose and overall outcomes

(1) The purpose of the District centre zone code is to provide for a range of uses and activities that service the needs of district catchments in centres that are highly accessible and well connected to the catchment areas that they serve.

The zone may accommodate a concentration of land uses including retail, commercial, residential, offices, administrative and health services, community, small-scale entertainment and recreational facilities capable of servicing the day-to-day and weekly shopping and service needs of a district or subregion, provided that those facilities and uses should not more appropriately be accommodated in the Bundaberg CBD or the major activity centre.

District centres are developed as well-designed, safe and visually attractive business, community and employment centres, predominantly in a low rise building format, where significant off-site impacts are avoided.

District centres complement and do not undermine the role and function of Bundaberg CBD as the principal activity centre for the region and the major activity centre focussed on the Sugarland Shopping Centre and environs.

Note—the District centre zone comprises both district activity centres (rural) and district activity centres (urban).

- (2) The purpose of the District centre zone code will be achieved through the following overall outcomes:-
 - (a) development provides for a range of retail uses that does not include a department store, and discount department stores are only established in the zone where there is demonstrated need:
 - (b) land use composition in the zone promotes an active, mixed use environment;
 - development provides for a range of residential activities that are ancillary to and support the predominant business functions of the zone;
 - (d) land uses contributing to employment, education and services in the Bundaberg Region are located in the centre. However, development does not undermine or compromise the activity centre network by proposing higher order or larger scale of uses that are more appropriately located in the principal activity centre or major activity centre;
 - (e) new regional level State government facilities for justice, education, health, community, administration and employment activities serving the Bundaberg Region are located in the Bundaberg CBD as the principal activity centre rather than in district centres;
 - (f) district activity centres at Childers and Gin Gin contain a concentration of shopping, business, community, entertainment and government uses that serve residents, tourists and primary industries in the town and its rural hinterland;
 - (g) the Kepnock district activity centre services the existing eastern suburbs of Bundaberg City, the growth corridor of Kalkie Ashfield, and the central coastal area towns with shopping facilities and other complimentary uses. Development of the centre is to ensure that:
 - it is well connected to surrounding residential areas through a walkable and cycle friendly pathway network;

- (ii) multi-unit and other residential uses (such as shop top living and mixed use residential activities) contribute to the creation of an active main street / town centre; and
- (iii) activities such as cafés and smaller retail shops encourage the use of the main street and community space areas outside normal business hours.
- (h) development encourages and facilitates urban consolidation;
- development facilitates the creation of vibrant and safe activity centres, with attractive and functional buildings, streets, open space and other public places provided;
- development ensures that the relationship between uses and the public realm is enhanced and that each activity centre is outwardly focused;
- (k) where the zone includes a traditional "main street" character, development maintains and reinforces this established character;
- development has a predominantly low-rise built form that is compatible with the existing and intended scale and character of the streetscape and surrounding area;
- (m) development provides for efficient and effective transport networks that maximise accessibility within and to the centre; and
- development encourages and facilitates the efficient provision and safe operation of physical and social infrastructure.

6.2.6.3 Specific benchmarks for assessment

Table 6.2.6.3.1 Benchmarks for assessable development

Performance outcomes	Acceptable outcomes
Land use composition and activity centre netwo	rk
PO1 Development in the District centre zone provides for a range of retail business activities, including shops and shopping centres, which service the day to day and weekly shopping needs of coastal and rural towns and villages or groups of residential neighbourhoods in Bundaberg.	AO1 No acceptable outcome provided.
PO2 Development for business activities is of a scale and intensity that is consistent with the intended role and function of a district activity centre.	AO2 No acceptable outcome provided.
PO3 Development ensures that higher order shopping facilities, including department stores, are not established in the District centre zone and discount department stores are only established in the zone where there is demonstrated need.	AO3 No acceptable outcome provided.
PO4 In addition to retail uses, development provides for a mix of other business activities and community activities to promote an active, mixed use environment.	AO4 Development provides for the following activities:- (a) food and drink outlets (e.g. local restaurant and dining facilities); (b) local health care services; (c) offices (e.g. banks and real estate agencies); (d) entertainment uses (e.g. a club, function facility or theatre); and (e) an appropriate range of community activities and support services.
PO5 Development for offices in urban district activity centres is of a scale and intensity that does not adversely impact on the Bundaberg principal activity centre's ability to attract, support and maintain the highest order and intensity of	AO5 No acceptable outcome provided.

6.2.7 Local centre zone code

6.2.7.1 Application

This code applies to development:-

- (a) within the Local centre zone as identified on the zone maps contained in Schedule 2 (Mapping);
 and
- (b) identified as requiring assessment against the Local centre zone code by the tables of assessment in **Part 5 (Tables of assessment)**.

6.2.7.2 Purpose and overall outcomes

(1) The purpose of the Local centre zone code is to provide for a limited range of land uses and activities to meet the local level retail, business and community needs of coastal towns and their surrounding rural catchments and residential neighbourhoods within Bundaberg.

The zone accommodates local shopping and commercial activities, cafes and dining, community services and residential development where it can integrate and enhance the fabric of the activity centre, but is not the predominant use.

Local centres are developed as well-designed, safe and visually attractive centres, predominantly in a low rise building format, where significant off-site impacts are avoided.

Local centres complement and do not undermine the role and function of higher order activity centres.

- (2) The purpose of the Local centre zone code will be achieved through the following overall outcomes:-
 - (a) development provides for a range of business activities that are compatible with the intended role and function of the Local centre zone, but does not include a department store or discount department store, and full-line supermarkets are only established in the zone where there is demonstrated need;
 - (b) development provides for a range of complementary uses in appropriate locations to support community wellbeing and local employment opportunities;
 - (c) development provides for a limited range of residential activities that are ancillary to and support the predominant business functions of the zone, with short-term accommodation provided in appropriate locations to meet the needs of tourists and travellers;
 - (d) development within the Bargara and Burnett Heads town centres:-
 - provides for an active and vibrant public realm accommodating a variety of shopping, dining and entertainment activities;
 - contributes to an attractive and functional streetscape incorporating high quality urban design and landscaping to retain and build upon the character of these coastal towns; and
 - (iii) provides an appropriate density of residential development to accommodate an immediate resident population to support these local centres;
 - (e) land uses contributing to employment, education and services in the Bundaberg Region are located in the centre commensurate with its local role and function. However, development does not undermine or compromise the activity centre network by proposing higher order or larger scale of uses that are more appropriately located in the principal activity centre, major activity centre or district centres;
 - (f) new regional level State government facilities for justice, education, health, community, administration and employment activities serving the Bundaberg Region are located in the Bundaberg CBD as the principal activity centre rather than in local centres;
 - (g) development has a built form that: -
 - is predominantly low-rise, with a low to medium rise built form in the Bargara and Burnett Heads town centres; and

- (ii) is compatible with the existing and intended scale and character of the streetscape and surrounding area;
- (h) development incorporates a high standard of architecture, urban design and landscaping that creates an attractive and functional "main street" setting or otherwise provides an attractive streetfront address;
- development provides for efficient and effective transport networks that maximise accessibility within and to the centre; and
- development encourages and facilitates the efficient provision and safe operation of physical and social infrastructure.

6.2.7.3 Specific benchmarks for assessment

Table 6.2.7.3.1 Benchmarks for assessable development

Performance outcomes	Acceptable outcomes
Land use composition and activity centre network	
PO1 Development provides for a range of business activities that service the local level convenience needs of residents and surrounding tourism or primary production industries, and offers locally-based employment opportunities.	AO1 No acceptable outcome provided.
Note—such business activities include, but are not limited to, food and drink outlets, small-scale offices, shops, small shopping centres and veterinary services.	
PO2 Development for business activities is of a scale and intensity that is consistent with the intended role and function of the local activity centre.	AO2 No acceptable outcome provided.
PO3 Development ensures that:- (a) higher order shopping facilities, including department stores and discount department stores, are not established in the zone; and (b) major full-line supermarkets are only established in the zone where there is demonstrated need.	AO3 No acceptable outcome provided.
PO4 Development provides for a range of complementary community activities in appropriate locations to encourage community interaction and support the health, safety and wellbeing of local residents.	AO4 No acceptable outcome provided.
Note—such community activities include community uses, emergency services and health care services.	
PO5 Service industry and utility uses may also be established in the zone where such uses are compatible with the character and amenity of surrounding development.	AO5 No acceptable outcome provided.
PO6 Development provides for a limited range of residential activities, primarily accommodated in mixed use buildings, where such activities are ancillary to and support the predominant business functions of the zone.	AO6 Development provides for one or more of the following residential activities, accommodated in a mixed use building format:- (a) caretaker's accommodation; (b) dual occupancies; (c) dwelling units (e.g. shop top housing); (d) multiple dwellings; and (e) short-term accommodation.
PO7 Short-term accommodation is established in those parts of the zone located in tourism focus areas and in locations that are highly accessible to	AO7 No acceptable outcome provided.

Performance outcomes	Acceptable outcomes
tourists or travellers (e.g. Moore Park Beach,	
Burnett Heads, Bargara and Elliott Heads).

Development, other than in the Burnett Heads and Bargara town centres, has a maximum building height of 2 storeys and 10m.	No acceptable outcome provided.
PO9 Development in the Bargara town centre has a maximum building height of 5 storeys.	AO9 No acceptable outcome provided.
PO10 Development in the Burnett Heads town centre has a building height, awnings, and front setbacks in accordance with Figure 6.2.7A (Burnett Heads town centre alternative Building Heights and Setbacks). Figure 6.2.7A Burnett Heads town centre alternative Building Heights and Setbacks	AO10 No acceptable outcome provided.
HARBOUR ESPLANADE 3 Storey (12m) 5 Storey (20m) Zero setback Awning to be full width of the footpath or 2.5m when full width is not practical.	
PO11 Development in the Burnett Heads and Bargara town centres: - (a) positively contributes to the streetscape and maintains a high level of residential amenity; and (b) provides for buildings that are built to the street frontage and designed to promote activity, including wide awnings to provide for footpath dining and all-weather protection for pedestrians.	AO11 No acceptable outcome provided.
Note—in assessing whether development maintains or provides a high level of residential amenity, the assessment manager will consider both the potential impacts on the amenity of nearby residents and premises, and the residential amenity for future residents of the proposed development, having regard to (amongst other things):- (a) adequate day light and ventilation to habitable rooms, the extent and duration of any overshadowing and other microclimatic impacts; (b) privacy and overlooking impacts; and (c) building mass and scale as seen from neighbouring premises, and from the street.	

Performance outcomes	Acceptable outcomes
PO12	AO12

functional buildings, streets and places.	
P013 Where existing development in the zone exhibits a traditional "main street" character, new development maintains and reinforces this established character.	AO13 No acceptable outcome provided.
Transport networks	
PO14	AO14
Development encourages public transport accessibility and use and also provides for pedestrian, bicycle and vehicular movement networks that maximise connectivity, permeability and ease of movement within and to the centre.	No acceptable outcome provided.
Infrastructure and services	
PO15 Development is provided with urban services to support the needs of the community, including parks, reticulated water, sewerage, stormwater drainage, sealed roads, pathways, electricity and telecommunication infrastructure.	AO15 No acceptable outcome provided.
PO16	AO16
Development does not adversely impact on the continued operation, viability and maintenance of existing infrastructure or compromise the future provision of planned infrastructure.	No acceptable outcome provided.

6.2.8 Neighbourhood centre zone code

6.2.8.1 Application

This code applies to development:-

- (a) within the Neighbourhood centre zone as identified on the zone maps contained in Schedule 2 (Mapping); and
- identified as requiring assessment against the Neighbourhood centre zone code by the tables of assessment in Part 5 (Tables of assessment).

6.2.8.2 Purpose and overall outcomes

(1) The purpose of the Neighbourhood centre zone code is to provide for a small range of land uses and activities to support the basic convenience needs of local neighbourhoods or parts of neighbourhoods.

The zone accommodates small-scale convenience shopping, offices, community activities and other uses which directly support the basic convenience needs of the immediate community.

The zone also accommodates existing standalone business or entertainment activities, such as general stores, service stations and hotels, which do not form part of a higher order activity centre.

Where located in a village setting, the zone may contain a larger range of uses and activities that cater to and support the basic convenience needs of both village residents and the immediately surrounding rural and rural residential areas as well as the needs of tourists, visitors and the travelling public.

Neighbourhood centres complement and do not undermine the role and function of higher order activity centres.

- (2) The purpose of the Neighbourhood centre zone code will be achieved through the following overall outcomes:-
 - development provides for a small range of business activities that service the day-to-day needs of localised catchments and are compatible with the intended role and function of the Neighbourhood centre zone;
 - (b) land uses contributing to employment, education and services in the Bundaberg Region are located in the centre commensurate with its local role and function. However, development does not undermine or compromise the activity centre network by proposing higher order or larger scale of uses that are more appropriately located in the principal activity centre, major activity centre, district centres or local centres;
 - (c) new regional level State government facilities for justice, education, health, community, administration and employment activities serving the Bundaberg Region are located in the Bundaberg CBD as the principal activity centre rather than in neighbourhood centres;
 - (d) development provides for a limited range of complementary uses in appropriate locations to support community wellbeing and local employment opportunities;
 - development provides for a limited range of residential activities that are ancillary to and support the predominant business functions of the zone;
 - (f) development has a low-rise built form that: -
 - is compatible with the existing and intended scale and character of the streetscape and surrounding area; and
 - (ii) incorporates a high standard of architecture, urban design and landscaping that is compatible with and sympathetic to its setting and context;
 - (g) development does not unreasonably impact on the amenity of surrounding premises; and
 - (h) development encourages and facilitates the efficient provision and safe operation of physical and social infrastructure.

6.2.9 Industry zone code

6.2.9.1 Application

This code applies to development:-

- (a) within the Industry zone as identified on the zone maps contained in Schedule 2 (Mapping); and
- (b) identified as requiring assessment against the Industry zone code by the tables of assessment in **Part 5 (Tables of assessment)**.

6.2.9.2 Purpose and overall outcomes

- (1) The purpose of the Industry zone is to provide for:-
 - (a) a variety of industry activities; and
 - (b) other uses and activities that:-
 - (i) support industry activities; and
 - (ii) do not compromise the future use of premises for industry activities.
- (2) The purpose of the Industry zone code will be achieved through the following overall outcomes:-
 - (a) uses in the zone are predominantly for low to medium intensity industrial activities;
 - (b) high impact industry uses are only established in the zone where adverse impacts can be avoided or mitigated;
 - special industry and those industrial uses with the potential to generate significant off-site impacts are not established in the zone;
 - (d) a limited range of non-industrial uses may be established in zone where:-
 - (i) ancillary to and directly supporting the ongoing industrial use of the zone; and/or
 - (ii) allied and compatible with industrial uses;
 - (e) development in the zone is protected from intrusion by incompatible land uses and land fragmentation;
 - (f) industry areas are well designed, make efficient use of available industrial land and provide a range of lot sizes and adaptable building configurations that cater for a variety of industry needs;
 - (g) development has a predominantly low-rise built form that is sympathetic to the existing and intended scale and character of the streetscape and surrounding area and provides for a modern, safe and functional industrial environment;
 - (h) development maintains public health and safety and avoids or mitigates significant adverse environmental or amenity impacts;
 - development provides for efficient and effective transport networks that maximise accessibility within and to the zone; and
 - development encourages and facilitates the efficient provision and safe operation of physical and social infrastructure.

6.2.9.3 Specific benchmarks for assessment

Table 6.2.9.3.1 Benchmarks for assessable development

Performance outcomes	Acceptable outcomes
Land use composition	
P01	AO1
Uses in the zone are predominantly for low to medium intensity industrial activities.	No acceptable outcome provided.

Note—such activities include low impact industry, marine industry, medium impact industry, research and technology industry, service industry, transport depot and warehouse. POZ High impact industry uses are only established in the zone where such uses: (a) are appropriately separated from adjoining or nearby sensitive land uses; and (b) can operate without impacting on other industry or non-industry uses within the zone. PO3 Non-industrial uses may be established where ancillary to and directly supporting the ongoing industrial use of the zone. Note—such non-industrial uses include caretaker's accommodation and tood and drink outlets (e.g. take-away stores and snack bars). PO4 Other non-industrial uses which are allied or compatible with industry activities may also be established in the zone, provided that such uses are appropriately located and designed to ensure that they do not compromise the ongoing operation and viability of industry activities. Note—such non-industrial uses include agricultural supplies stores, car wesh, hardware and trade supplies, indoor sport and recreation, service stations and vereinary services. PO5 Existing and planned industrial uses in the zone are protected from the intrusion of incompatible uses that may compromise or conflict with the primary use of premises for industry purposes. PO6 Evelopment has a maximum building height of 12m. PO7 Industrial activities contribute positively to the image of the Bundaberg Region through a high quality of built form and landscaping, particularly where visible from the street or other public places, in keeping with the expectations of a modern, safe, and functional industrial activities on the natural environment. Effects of development Effects of development contribute positively to development ensures that uses and works for industrial andimal public health and safety, avoid significant adverse effects on the natural environment, and environment. 6.2.10 High impact industry zone code

6.2.10.1 Application

This code applies to development:-

- (a) within the High impact industry zone as identified on the zone maps contained in **Schedule 2** (**Mapping**); and
- (b) identified as requiring assessment against the High impact industry zone code by the tables of assessment in Part 5 (Tables of assessment).

6.2.10.2 Purpose and overall outcomes

- (1) The purpose of the High impact industry zone is to provide for:-
 - (a) high impact industry; and
 - (b) other uses and activities that:-
 - (i) support industry activities; and
 - (ii) do not compromise the future use of premises for industry activities.
- (2) The purpose of the High impact industry zone code will be achieved through the following overall outcomes:-
 - (a) uses in the zone are predominantly for higher intensity industry activities;
 - (b) other industry activities, compatible with higher intensity industry activities, may also be established in the zone;
 - (c) a limited range of non-industrial uses may be established in zone where:-
 - (i) ancillary to and directly supporting the ongoing industrial use of the zone; and/or
 - (ii) allied and compatible with industry activities;
 - (d) development in the zone is protected from intrusion by incompatible land uses and land fragmentation;
 - development maintains public health and safety and avoids or mitigates significant adverse environmental or amenity impacts;
 - (f) development has a predominantly medium-rise built form that is sympathetic to the existing and intended scale and character of the streetscape and surrounding area and provides for a modern, safe and functional industrial environment;
 - (g) industry areas are well designed, and make efficient use of available industrial land;
 - (h) development provides for efficient and effective transport networks that maximise accessibility within and to the zone; and
 - development encourages and facilitates the efficient provision and safe operation of physical and social infrastructure.

6.2.11 Sport and recreation zone code

6.2.11.1 Application

This code applies to development:-

- (a) within the Sport and recreation zone as identified on the zone maps contained in **Schedule 2** (Mapping); and
- (b) identified as requiring assessment against the Sport and recreation zone code by the tables of assessment in **Part 5 (Tables of assessment)**.

6.2.11.2 Purpose and overall outcomes

- (1) The purpose of the Sport and recreation zone is to provide for:-
 - (a) a variety of cultural, educational, recreation and sporting uses and activities that require built infrastructure, including, for example, clubhouses, gymnasiums, swimming pools or tennis courts; and
 - (b) facilities and infrastructure to support the uses and activities stated in paragraph (a).
- (2) The purpose of the Sport and recreation zone code will be achieved through the following overall outcomes:-
 - development in the zone provides for a range of recreation activities that meet the active sport and recreational needs of residents and visitors;
 - (b) ancillary uses and facilities that support the predominant recreation activities may also be established in the zone:
 - sport and recreation open space may be used for temporary or periodical uses, where compatible with the role and function of the zone;
 - (d) development facilitates and encourages the efficient and effective provision and use of indoor and outdoor sport and recreation facilities and their integration with the broader regional open space network;
 - (e) development in the zone is protected from intrusion by incompatible land uses;
 - (f) development maintains public health and safety and avoids or mitigates significant adverse environmental or amenity impacts;
 - (g) development provides for efficient and effective transport networks that maximise accessibility within and to sport and recreation areas; and
 - (h) development encourages and facilitates the efficient provision and safe operation of physical and social infrastructure.

6.2.12 Open space zone code

6.2.12.1 Application

This code applies to development:-

- (a) within the Open space zone as identified on the zone maps contained in Schedule 2 (Mapping);
 and
- identified as requiring assessment against the Open space zone code by the tables of assessment in Part 5 (Tables of assessment).

6.2.12.2 Purpose and overall outcomes

- (1) The purpose of the Open space zone is to provide for:-
 - (a) local, district and regional parks for the use of residents and visitors; and
 - (b) facilities and infrastructure that support, and are required by, users of the parks.

Editor's note—facilities and infrastructure that support, and are required by, users of the parks include shelters, amenity facilities, picnic tables, playgrounds and infrastructure to provide safe access and essential management of parks.

- (2) The purpose of the Open space zone code will be achieved through the following overall outcomes:-
 - development in the zone predominantly provides for the informal active recreational needs of residents and visitors;
 - (b) limited other uses and facilities that support the use and enjoyment of open space may also be established in the zone;
 - (c) open space may be used for temporary or periodical uses, where compatible with the role and function of the zone;
 - (d) open space is protected from the intrusion of incompatible uses and land use conflicts are avoided;
 - development facilitates and encourages the efficient and effective provision and use of open space and its integration with the broader regional open space network;
 - (f) development provides a high level of amenity and is compatible with the existing and intended scale and character of the streetscape and surrounding area;
 - (g) development provides for efficient and effective transport networks that maximise accessibility within and to sport and recreation areas; and
 - (h) development encourages and facilitates the efficient provision and safe operation of physical and social infrastructure.

Part 6 – Zones

6.2.13 Environmental management and conservation zone code

6.2.13.1 Application

This code applies to development:-

- (a) within the Environmental management and conservation zone as identified on the zone maps contained in **Schedule 2 (Mapping)**; and
- (b) identified as requiring assessment against the Environmental management and conservation zone code by the tables of assessment in Part 5 (Tables of assessment).

6.2.13.2 Purpose and overall outcomes

- (1) The purpose of the Environmental management and conservation zone is to provide for the protection and maintenance of areas that support one or more of the following:-
 - (a) biological diversity;
 - (b) ecological integrity;
 - (c) naturally occurring land forms;
 - (d) coastal processes.
- (2) The purpose of the Environmental management and conservation zone code will be achieved through the following overall outcomes:-
 - significant natural environmental values in the zone are protected for their importance in contributing to ecological sustainability;
 - development provides for the preservation, protection and rehabilitation of land to maintain biodiversity, ecological processes, wildlife movement corridors, coastal processes, water quality, scenic amenity, cultural heritage significance and community wellbeing;
 - small scale and low key activities that support the community's appreciation and enjoyment of environmental values are facilitated;
 - (d) low impact utility installations may be provided where significant adverse impacts are avoided or mitigated;
 - (e) development maintains scenic values and landscape character; and
 - (f) development encourages and facilitates the efficient provision and safe operation of physical and social infrastructure and ensures that public safety and environmental health is maintained.

6.2.13.3 Specific benchmarks for assessment

6.2.14 Community facilities zone code

6.2.14.1 Application

This code applies to development:-

- (a) within the Community facilities zone as identified on the zone maps contained in Schedule 2
 (Mapping); and
- (b) identified as requiring assessment against the Community facilities zone code by the tables of assessment in **Part 5 (Tables of assessment)**.

6.2.14.2 Purpose and overall outcomes

- (1) The purpose of the Community facilities zone is to provide for community-related uses, activities and facilities, whether publicly or privately owned, including, for example:-
 - (a) educational establishments;
 - (b) hospitals;
 - (c) transport and telecommunication networks;
 - (d) utility installations.
- (2) The purpose of the Community facilities zone code will be achieved through the following overall outcomes:-
 - (a) development in the zone caters primarily for specified uses, facilities and works which
 provide a service or function to the social, educational, health, and cultural needs of the
 community, in addition to a limited range of allied and compatible uses;
 - (b) community facilities and associated uses are appropriately located, provide a high level of amenity, are safe and are compatible with surrounding development;
 - (c) development contributes a built form design and building height that is of a character, intensity and scale consistent with existing and intended development in the surrounding area:
 - (d) community facilities are protected from the intrusion of incompatible uses and land use conflicts are avoided;
 - development provides for efficient and effective transport networks that maximise accessibility within and to community facilities; and
 - (f) development encourages and facilitates the efficient provision and safe operation of physical and social infrastructure.

Development does not adversely impact on the	No acceptable outcome provided.
continued operation, viability and maintenance of	
existing infrastructure (including rural infrastructure)	
or compromise the future provision of planned	
infrastructure.	

6.2.15 Emerging community zone code

6.2.15.1 Application

This code applies to development:-

- (a) within the Emerging community zone as identified on the zone maps contained in **Schedule 2** (Mapping); and
- (b) identified as requiring assessment against the Emerging community zone code by the tables of assessment in Part 5 (Tables of assessment).

6.2.15.2 Purpose and overall outcomes

- (1) The purpose of the Emerging community zone is to:-
 - (a) identify land that is intended for an urban purpose in the future;
 - (b) protect land that is identified for an urban purpose in the future from incompatible uses; and
 - (c) provide for the timely conversion of non-urban land to land for urban purposes.
- (2) The purpose of the Emerging community zone code will be achieved through the following overall outcomes:-
 - (a) land converted to urban purposes is developed in an efficient, coordinated and sustainable manner to facilitate the creation of complete and vibrant communities that:-
 - (i) comprise interconnected residential neighbourhoods;
 - (ii) are effectively integrated with existing communities; and
 - (iii) are provided with necessary supporting services, facilities, infrastructure and open space;
 - (b) interim land uses and development in the zone do not compromise the future potential use of land for urban purposes, as a result of the fragmentation of land parcels, the encroachment or establishment of inappropriate land use activities or other cause;
 - (c) development is undertaken in accordance with a plan of development that appropriately addresses the matters identified in the performance outcomes of this code and any applicable local plan code at **Part 7 (Local plans)**, and which may be implemented via a preliminary approval pursuant to section 49 of the Act that includes a variation approval;
 - (d) the Branyan identified growth area is not developed for urban purposes until such time as further investigations into the suitability of the land for urban development, and local structure planning has been undertaken by the Council.
 - Editor's note—the Branyan identified growth area is described in the regional plan and is identified on Strategic Framework Map SFM-001 (Settlement pattern elements) as a Major urban expansion area.
 - (e) unless otherwise specified in a local plan code, development provides for a predominantly low rise building form that is compatible with the character of the surrounding area;
 - (f) development and infrastructure provision in the zone occurs in a logical, orderly and efficient manner and is appropriately integrated with, and connected to, the surrounding urban fabric;
 - (g) development in the zone sensitively responds to inherent physical constraints, environmental constraints, natural hazards, scenic amenity values and landscape character elements;
 - (h) development provides for efficient and effective transport networks that maximise accessibility within and to emerging community areas; and
 - development for residential or other sensitive purposes incorporates appropriate buffers to
 potentially conflicting land uses, including industry and enterprise areas, rural activities, and
 infrastructure.

6.2.16 Limited development zone code

6.2.16.1 Application

This code applies to development:-

- (a) within the Limited development zone as identified on the zone maps contained in Schedule 2
 (Mapping); and
- (b) identified as requiring assessment against the Limited development zone code by the tables of assessment in Part 5 (Tables of assessment).

6.2.16.2 Purpose and overall outcomes

(1) The purpose of the Limited development zone code is to identify land that is significantly affected by one or more development constraints, including, for example, constraints relating to defence requirements, flooding, historical subdivisions, land contamination, past or future mining activities or topography.

Such constraints pose severe restrictions on the ability of the land to be developed for urban purposes.

More specifically, the purpose of the Limited development zone code is to limit development on land that is subject to the following circumstances:-

- (a) land located in an urban setting but is unsuitable for such purposes due to significant flooding constraints, access limitations or exposure to adverse amenity impacts; or
- (b) land subject to a historical subdivision that is unsuitable for residential purposes in its current configuration due to servicing, physical, environmental or other development constraints.
- (2) The purpose of the Limited development zone code will be achieved through the following overall outcomes:-
 - development is generally limited to pre-existing uses or new uses of a low-intensity, nonurban or rural nature;
 - (b) individual dwelling houses may only be established in the zone under limited circumstances;
 - (c) where development is proposed, it is of a low-intensity and scale and is compatible with the nature of the constraints present on the site;
 - (d) no additional lots are created in the zone, unless for accommodating essential infrastructure, services or facilities;
 - historical subdivisions included in the zone may only be further developed for residential purposes subject to appropriate servicing arrangements and the provision of a more contemporary and responsive subdivision pattern and layout;
 - (f) development predominantly has a low-rise built form and maintains the low intensity character of the zone, incorporates a high level of residential amenity, and provides for the personal health of residents and safety and protection for property;
 - (g) development encourages and facilitates the efficient provision and safe operation of physical and social infrastructure; and
 - (h) in addition to the overall outcomes for the zone generally, development in Precinct LDZ1 (Limited residential precinct) does not materially intensify residential activities on premises located in high flood hazard areas.

6.2.16.3 Specific benchmarks for assessment

Table 6.2.16.3.1 Benchmarks for assessable development

Performance outcomes	Acceptable outcomes
Land use composition	- Moodplable Odloomes -
PO1	AO1
Development in the zone is generally limited to pre- existing uses or new uses of a low-intensity, non- urban or rural nature.	No acceptable outcome provided.
Notes—such uses include animal husbandry, cropping, wholesale nursery, park, environment facility and utility installation.	
PO2	AO2
Individual dwelling houses may only be established in the zone where they are located, sited and designed to mitigate the impact of the constraints on the safety and wellbeing of residents.	No acceptable outcome provided.
Reconfiguring a lot	
PO3	AO3
No additional lots are created in the zone, unless the subdivision is for the purposes of accommodating any of the following uses:- (a) emergency services; (b) water cycle management infrastructure; (c) a telecommunications facility; or (d) electricity infrastructure.	No acceptable outcome provided.
Historical subdivisions	
Historical subdivisions included in the zone may only be further developed for residential purposes subject to appropriate address of the following matters:- (a) the availability and provision of supporting infrastructure and services to adequately service the development; and (b) the need to potentially reconfigure the historical subdivision pattern and layout to provide a more contemporary response to:- (i) physical and environmental constraints; (ii) natural hazards; (iii) topography; (iv) on-site effluent treatment and disposal (where sewerage is not available); (v) accessibility; and (vi) management of potential land use conflicts.	No acceptable outcome provided.
Building height	
PO5 Development has a maximum building height of 2 storeys and 8.5m.	AO5 No acceptable outcome provided.
Amenity	1400
PO6 Development maintains a high level of amenity and avoids or mitigates potential adverse impacts having regard to such matters as hours of operation, generation of odours, noise, waste products, dust, traffic, electrical interference, lighting, visual and privacy impacts.	AO6 No acceptable outcome provided.
Infrastructure and services	
PO7 Development provides for infrastructure and services that are commensurate with the very limited range of small scale and low-key activities that are expected to occur in the zone.	No acceptable outcome provided.

Performance outcomes	Acceptable outcomes
PO8	AO8
Development does not adversely impact on the continued operation, viability and maintenance of existing infrastructure (including rural infrastructure) or compromise the future provision of planned infrastructure.	No acceptable outcome provided.
Additional requirements for Precinct LDZ1 (Limited residential precinct)	
PO9	AO9
Development in Precinct LDZ1 (Limited	No acceptable outcome provided.
residential precinct):-	
(a) provides for the re-establishment of dwelling houses and refurbishment of existing dwelling houses on premises located in high flood hazard areas; and	
(b) avoids intensification of other residential activities.	

6.2.17 Rural zone code

6.2.17.1 Application

This code applies to development:-

- (a) within the Rural zone as identified on the zone maps contained in Schedule 2 (Mapping); and
- (b) identified as requiring assessment against the Rural zone code by the tables of assessment in **Part 5 (Tables of assessment)**.

6.2.17.2 Purpose and overall outcomes

- (1) The purpose of the Rural zone is to:-
 - (a) provide for rural uses and activities; and
 - (b) provide for other uses and activities that are compatible with:-
 - (i) existing and future rural uses and activities; and
 - (ii) the character and environmental features of the zone; and
 - (c) maintain the capacity of land for rural uses and activities by protecting and managing significant natural resources and processes.
- (2) The purpose of the Rural zone code will be achieved through the following overall outcomes:-
 - (a) development provides for a broad range of rural activities as well as more intensive rural activities, provided that adverse environmental and amenity impacts are avoided or appropriately managed;
 - (b) permanent residential accommodation in the zone is generally limited in scale and intensity;
 - (c) complementary uses such as on-farm rural workers' accommodation, visitor accommodation and non-rural uses that support rural enterprise or rural tourism activities may be established in the zone:
 - (d) development minimises conflicts with existing and future rural uses and activities on the surrounding rural lands and ensures that the productive capacity of rural land is protected for rural uses and associated value adding industries;
 - development provides for the protection of agricultural land classification (ALC) Class A and Class B land for sustainable agricultural use;
 - (f) further subdivision of rural lands is minimised and fragmentation is prevented, to maintain viable farm sizes and to support the ability of landowners to continue rural pursuits;
 - (g) development maintains the rural and landscape character, scale and amenity of the zone;
 - (h) development has a predominantly low rise built form to maintain the rural character and amenity of the zone; and
 - development encourages and facilitates the efficient provision and safe operation of physical and social infrastructure.

6.2.17.3 Specific benchmarks for assessment

Table 6.2.17.3.1 Benchmarks for assessable development

Performance outcomes	Acceptable outcomes
Land use composition	
PO1	AO1
Development in the Rural zone provides for a broad range of rural activities to support the ongoing productive use of rural lands.	No acceptable outcome provided.

appropriately designed, operated and managed to	
minimise significant nuisance and environmental	
impacts on surrounding premises.	
Protection of agricultural land	
PO8	AO8
Development does not alienate, fragment or	No acceptable outcome provided.
diminish productivity of agricultural land	
classification (ALC) Class A and Class B land,	
unless:-	
(a) there is an overriding need for the	
development in terms of public benefit; and	
(b) no other site is suitable for the particular	
purpose.	
Building height and built form	
PO9	AO9
Development has a maximum building height of:-	No acceptable outcome provided.
(a) 2 storeys and 8.5m for residential and other	
non-rural activities; and	
(b) 10m for rural activities.	
PO10	AO10
The built form of development:-	No acceptable outcome provided.
(a) integrates with and complements the	·
predominant rural character and scale of the	
zone; and	
(b) sensitively responds to the environmental and	
topographical features of the landscape.	
LUDUUIADIIIVAI TEALUIES UI IITE TAITUSCADE.	

Performance outcomes	Acceptable outcomes
Infrastructure and services	
PO11	AO11
Development provides for infrastructure and services that are commensurate with the very limited range of small scale and low-key activities	No acceptable outcome provided.
that are expected to occur in the zone.	
PO12	AO12
Irrigation areas and associated infrastructure are protected from potential damage or encroachment by incompatible rural and non-rural uses.	No acceptable outcome provided.
PO13	AO13
Development does not adversely impact on the continued operation, viability and maintenance of existing infrastructure (including rural infrastructure) or compromise the future provision of planned infrastructure.	No acceptable outcome provided.

6.2.18 Rural residential zone code

6.2.18.1 Application

This code applies to development:-

- (a) within the Rural residential zone as identified on the zone maps contained in Schedule 2 (Mapping); and
- identified as requiring assessment against the Rural residential zone code by the tables of assessment in Part 5 (Tables of assessment).

6.2.18.2 Purpose and overall outcomes

- (1) The purpose of the Rural residential zone is to provide for residential uses and activities on large lots, including lots for which the local government has not provided infrastructure and services.
- (2) The purpose of the Rural residential zone code will be achieved through the following overall outcomes:-
 - development provides for low density residential activities and a range of relatively large residential lot sizes;
 - (b) limited other residential activities and non-residential uses may be established in the zone where they are small in scale, and the intensity and nature of the activity does not disturb the rural residential character and amenity of the surrounding locality, and if for a shop, services the daily needs of residents;
 - (c) development has a low-rise built form that maintains the low intensity character and rural residential amenity of the zone;
 - (d) development for residential uses adjacent to rural land does not interfere with the existing or ongoing use of the rural land for rural purposes;
 - (e) development ensures each identified rural residential precinct maintains the particular lifestyle option, local character, topography and constraints of the precinct, and generally maintain the following lot sizes:-
 - (i) precinct RRZ1 2,000m² lot size;
 - (ii) precinct RRZ2 4,000m² lot size; and
 - (iii) precinct RRZ3 4ha lot size;
 - (f) where not in a precinct, development maintains the existing residential density of the rural residential neighbourhood; and
 - (g) development encourages and facilitates the efficient provision and safe operation of physical and social infrastructure.

6.2.18.3 Specific benchmarks for assessment

Table 6.2.18.3.1 Benchmarks for assessable development

Performance outcomes	Acceptable outcomes
Land use composition	
PO1	AO1
Development provides for low density residential activities, primarily in the form of dwelling houses within a semi-rural setting.	No acceptable outcome provided.
PO2	AO2
Home based businesses and nature-based tourism may be established in the zone where the scale, intensity and nature of the activity do not disturb the rural residential character and amenity of the surrounding locality.	No acceptable outcome provided.

Performance outcomes	Acceptable outcomes
PO3	AO3
Non-residential uses are limited to small-scale and	No acceptable outcome provided.
low intensity rural activities and other uses that are	
compatible with the prevailing rural residential	
character and amenity of the zone. Shops are limited	
to those that service the daily needs of residents.	
Note and was include adaptation as a manualty	
Note—such uses include sales office, community	
uses, emergency services and utility installation. Reconfiguring a lot

6.2.19 Special purpose zone code

6.2.19.1 Application

This code applies to development:-

- (a) within the Special purpose zone as identified on the zone maps contained in Schedule 2
 (Mapping); and
- (b) identified as requiring assessment against the Special purpose zone code by the tables of assessment in Part 5 (Tables of assessment).

6.2.19.2 Purpose and overall outcomes

- (1) The purpose of the Special purpose zone code is to:-
 - recognise and facilitate industrial development of a regional, state and national significance within the Port of Bundaberg and Bundaberg State Development Area;
 - (b) facilitate and maintain linkages to the Port of Bundaberg and major freight routes;
 - (c) ensure that incompatible development does not encroach on or prejudice development within the Port of Bundaberg and the State Development Area; and
 - (d) ensure that development complements the role of the Port of Bundaberg as an economic, freight and logistics hub, and is consistent with the preferred development intent of the precincts within the Port of Bundaberg Land Use Plan and the State Development Area Development Scheme.

Editor's note—the Material change of use of premises regulated by the Bundaberg State Development Area Development Scheme is administered by the Coordinator–General. In this area, the planning scheme only regulates development for reconfiguring a lot, building work and operational work, and then, only if the area is not Strategic Port Land.

Editor's note—development on Strategic Port Land not regulated by the Bundaberg State Development Area Development Scheme is regulated by the Port of Bundaberg Land Use Plan and is administered by the Port Authority.

- (2) The purpose of the code will be achieved through the following overall outcomes:
 - the Port of Bundaberg and Bundaberg State Development Area accommodate a wide range of large-scale industry uses, particularly those which support or have a nexus with the Port;
 - development associated with other non-industrial uses is consistent with the preferred development intent of the precincts within the State Development Area or the Port of Bundaberg Land Use Plan, and is limited in extent;
 - (c) development maintains public health and safety and avoids or mitigates significant adverse environmental or amenity impacts;
 - (d) development provides for the efficient use of land, with lot sizes that cater for a range of large format industrial uses and discourage take up of land for smaller scale activities better suited to other zones;
 - (e) development provides for efficient and effective transport networks that maximise accessibility within and to the Port of Bundaberg and the Bundaberg State Development Area:
 - development encourages and facilitates the efficient provision and safe operation of physical and social infrastructure; and
 - (g) areas within the Bundaberg State Development Area that are intended for an urban purpose are limited to the urban areas identified in the Development Scheme for the Bundaberg State Development Area.

6.2.19.3 Specific benchmarks for assessment

(1) No performance outcomes or acceptable outcomes are provided. Development is required to demonstrate compliance with the purpose and overall outcomes of this code.

6.2.20 Specialised centre zone code

6.2.20.1 Application

This code applies to development:-

- (a) within the Specialised centre zone as identified on the zone maps contained in Schedule 2
 (Mapping); and
- (b) identified as requiring assessment against the Specialised centre zone code by the tables of assessment in **Part 5 (Tables of assessment)**.

6.2.20.2 Purpose and overall outcomes

- (1) The purpose of the Specialised centre zone code is to provide for large floor plate retail business activities and other activities which because of their size, requirement for high levels of accessibility to private motor vehicle traffic, or other characteristics, are best located outside of identified activity centres and adjacent to major road transport corridors.
- (2) The purpose of the Specialised centre zone code will be achieved through the following overall outcomes:-
 - (a) development provides for a range of retail business uses that have large floor plates and require high levels of visibility and accessibility to major roads;
 - development also provides for other business uses, some residential uses and some industrial uses which are well suited to establish in the zone;
 - development in the zone does not provide for higher order and other retail facilities better suited to establishing within an activity centre;
 - (d) land uses contributing to employment, education and services in the Bundaberg Region are located in the centre commensurate with its local role and function. However, development does not undermine or compromise the activity centre network by proposing a higher order, larger scale or different types of uses than intended for the centre;
 - (e) new regional level State government facilities for justice, education, health, community, administration and employment activities serving the Bundaberg Region are located in the Bundaberg CBD as the principal activity centre rather than in a specialised centre;
 - (f) development incorporates a high standard of built form, urban design and landscaping which makes a positive contribution to the streetscape and is sympathetic to the existing and intended scale and character of the surrounding area; and
 - (g) development encourages and facilitates the efficient provision and safe operation of physical and social infrastructure.

6.2.20.3 Specific benchmarks for assessment

Table 6.2.20.3.1 Benchmarks for assessable development

Performance outcomes	Acceptable outcomes
Land use composition and activity centre network	
PO1	AO1
Development provides for a range of retail business uses predominantly in the form of showrooms, garden centres, hardware and trade supplies and outdoor sales that have large floor plates and require high levels of visibility and accessibility to major roads.	No acceptable outcome provided.
PO2	AO2
Development also provides for other business uses (including food and drink outlets), some residential uses (particularly short-term accommodation) and some industrial uses which, because of their scale or	No acceptable outcome provided.
