

Part 5 Tables of assessment

5.1 Preliminary

The tables in this part identify the category of development, and the category of assessment and assessment benchmarks for assessable development within the planning scheme area¹.

5.2 Reading the tables

The tables identify the following:-

- (1) the category of development :
 - (a) prohibited;
 - (b) accepted, including accepted with requirements; and
 - (c) assessable development that requires either code or impact assessment;
- (2) the category of assessment - code or impact for assessable development in:-
 - (a) a zone and, where used, a precinct of a zone;
 - (b) a local plan where used and, where used, a precinct of a local plan;
 - (c) an overlay where used;
- (3) the assessment benchmark for assessable development, including:-
 - (a) whether a zone code or specific provisions in the zone code apply (shown in the assessment benchmarks column);
 - (b) if there is a local plan, whether a local plan code or specific provisions in the local plan code apply (shown in the assessment benchmarks column);
 - (c) if there is an overlay:-
 - (i) whether an overlay code applies (shown in **section 5.9 (Categories of development and assessment – Overlays)**); or
 - (ii) whether the assessment benchmarks as shown on the overlay map² (noted in the assessment benchmarks column) applies;
 - (d) any other applicable code(s) (shown in the assessment benchmarks column);
- (4) any variation to the category of assessment (shown as an “if” in the “categories of development and assessment” column) that applies to the development.

Note—development will only be taken to be prohibited development under the planning scheme if it is identified as prohibited development in Schedule 10 of the Regulation.

Editor’s note—examples of matters that can vary the category of assessment are gross floor area, height, numbers of people or precinct provisions.

¹ Editor’s Note—the categories of development and assessment identified in the tables of assessment in this part apply unless otherwise prescribed in a regulation or in another local categorising instrument, including a TLPI or variation approval.

² Note—this planning scheme uses the SPP interactive mapping system to identify particular overlays, or overlay elements. **Section 5.9 (Categories of development and assessment – Overlays)** and each code in **Part 8 (Overlays)** identifies which elements are mapped in **Schedule 2 (Mapping)** and which elements are identified in the SPP interactive mapping system.

5.3 Categories of development and assessment

5.3.1 Process for determining the category of development and the category of assessment for assessable development

The process for determining a category of development and category of assessment is:-

- (1) for a material change of use, establish the use by reference to the use definitions in **Schedule 1 (Definitions)**;
- (2) for all development, identify the following:-
 - (a) the zone or zone precinct that applies to the premises, by reference to the zone map in **Schedule 2 (Mapping)**;
 - (b) if a local plan or local plan precinct applies to the premises, by reference to the local plan map in **Schedule 2 (Mapping)**;
 - (c) if an overlay applies to the premises, by reference to the overlay mapping in **Schedule 2 (Mapping)** and the SPP interactive mapping system;
- (3) determine if the development is accepted development under Schedule 6 and 7 of the Regulation or is assessable or prohibited development under Schedule 10 of the Regulation;

Editor's note— Schedule 6 of the Regulation prescribes development a planning scheme is prohibited from stating is assessable development where the matters identified in the schedule are met. Schedule 7 of the Regulation identifies development the state makes accepted. Some development in Schedule 7 may still be made assessable under this planning scheme.

- (4) otherwise, determine the initial category of assessment by reference to the tables in:-
 - **section 5.4 (Categories of development and assessment – Material change of use)**;
 - **section 5.5 (Categories of development and assessment – Reconfiguring a lot)**;
 - **section 5.6 (Categories of development and assessment – Building work)**;
 - **section 5.7 (Categories of development and assessment – Operational work)**;
- (5) a precinct of a zone may change the categories of development or assessment and this will be shown in the category of assessment column of the tables in **sections 5.4, 5.5, 5.6 and 5.7**;
- (6) if a local plan applies, refer to the table(s) in **section 5.8 (Categories of development and assessment – Local plans)**, to determine if the local plan changes the category of development or assessment for the zone;
- (7) if a precinct of a local plan changes the category of development or assessment this will be shown in the category of development and assessment column of the table(s) in **section 5.8 (Categories of development and assessment – Local plans)**;
- (8) if an overlay applies refer to **section 5.9 (Categories of development and assessment – Overlays)** to determine if the overlay further changes the category of development or assessment.

5.3.2 Determining the category of development and categories of assessment

- (1) A material change of use is assessable development requiring impact assessment:-
 - (a) unless the table of assessment states otherwise; or
 - (b) if a use is not listed or defined; or
 - (c) unless otherwise prescribed within the Act or the Regulation.
- (2) Reconfiguring a lot is assessable development requiring code assessment unless the tables of assessment state otherwise or unless otherwise prescribed within the Act or the Regulation.
- (3) Building work and operational work is accepted development, unless the tables of assessment state otherwise or unless otherwise prescribed within the Act or the Regulation.

- (4) Where an aspect of development is proposed on premises included in more than one zone, local plan or overlay, the category of development or assessment for that aspect is the highest category under each of the applicable zones, local plans or overlays.
- (5) Where development is proposed on premises partly affected by an overlay, the categories of development or assessment for the overlay only relates to the part of the premises affected by the overlay.
- (6) For the purposes of Schedule 6, Part 2 Material change of use section (2)(2)(d)(i) or (ii) of the Regulation, an overlay does not apply to the premises if the development meets the acceptable outcomes that form the requirements for accepted development in the relevant overlay code.
- (7) If development is identified as having a different category of development or category of assessment under a zone than under a local plan or an overlay, the highest category of development or assessment applies as follows:-
 - (a) accepted development subject to requirements prevails over accepted development;
 - (b) code assessment prevails over accepted development where subject to requirements and accepted development;
 - (c) impact assessment prevails over code assessment, accepted development where subject to requirements and accepted development.
- (8) Despite section 5.3.2(4) and (7) above, a category of development and assessment in a local plan overrides a category of development and assessment in a zone.
- (9) The Regulation prescribes development that the planning scheme cannot make assessable in Schedule 6.

Editor's note—Schedule 7 of the Regulation also identifies development the state makes accepted. Some development in that Schedule may still be made assessable under this planning scheme.

- (10) Despite all of the above, if development is listed as prohibited development under Schedule 10 of the Regulation, a development application cannot be made.

Note—development is to be taken to be prohibited development under the planning scheme only if it is identified in Schedule 10 of the Regulation.

5.3.3 Determining the requirements for accepted development and assessment benchmarks and other matters for assessable development

- (1) Accepted development does not require a development approval and is not subject to assessment benchmarks. However, certain requirements may apply to some types of development for it to be accepted development. Where nominated in the tables of assessment, accepted development must comply with the requirements identified as acceptable outcomes in the relevant parts of the applicable code(s) as identified in the relevant column.
- (2) Accepted development that does not comply with one or more of the nominated acceptable outcomes in the relevant parts of the applicable code(s) becomes code assessable development unless otherwise specified.
- (3) The following rules apply in determining assessment benchmarks for each category of development and assessment.
- (4) code assessable development:-
 - (a) is to be assessed against all of the assessment benchmarks identified in the assessment benchmarks column;
 - (b) that occurs as a result of development becoming code assessable pursuant to **sub-section 5.3.3(2)**, must:-
 - (i) be assessed against the assessment benchmarks for the development application, limited to the subject matter of the required acceptable outcomes that were not complied with or were not capable of being complied with under **sub-section 5.3.3(2)**;

- (ii) comply with all required acceptable outcomes identified in **sub-section 5.3.3(1)**, other than those mentioned in **subsection 5.3.3(2)**;
- (c) that complies with:-
 - (i) the purpose and overall outcomes of the code complies with the code;
 - (ii) the performance or acceptable outcomes complies with the purpose and overall outcomes of the code;
- (d) is to be assessed against any assessment benchmarks for the development identified in Section 26 of the Regulation.

Editor's note—Section 27 of the Regulation also identifies the matters that code assessment must have regard to.

- (5) impact assessable development:-

- (a) is to be assessed against the identified assessment benchmarks in the assessment benchmarks column;

Note—the assessment benchmark for impact assessable development in this planning scheme is the whole of the planning scheme.

- (b) is to be assessed against any assessment benchmarks for the development identified in Section 30 of the Regulation.

Note—the first row of each table of assessment is to be checked to confirm if there are assessment benchmarks that commonly apply to generic scenarios in the zone, local plan or overlay.

Editor's note—Section 31 of the Regulation identifies the matters that impact assessment must have regard to.

All zones	Code assessment If not otherwise specified in this table as being subject to impact assessment.	• Applicable local plan code • Applicable zone code • Reconfiguring a lot code • Landscaping code • Nuisance code • Transport and parking code • Works, services and infrastructure code

⁵ Editor's note—under Schedule 6 of the Regulation, certain reconfiguring a lot is accepted development and cannot be declared to be accepted subject to requirements development, assessable development or prohibited development by a planning scheme (examples—amalgamating two or more lots or a building format plan of subdivision that does not subdivide land).

⁶ Editor's note—despite the categories of development and assessment identified in this section for reconfiguring a lot, in the circumstances identified in Schedules 10 and 12 of the Planning Regulation, subdivision of one lot into two lots is development requiring code assessment.

5.6 Categories of development and assessment – Building work

The following table identifies the categories of development and assessment for building work regulated under the planning scheme.
